

WHAT IS CLAIMED IS:

1. A point-of-presence comprising:

primary and secondary wireless radios;

an ethernet switch in communication with said primary and secondary radios;

5 a router in communication with said ethernet switch;

a primary power supply;

an uninterruptable power supply, or UPS, connected to said primary power supply,
said UPS providing power to said radios, said ethernet switch and said router;

10 a network having at least one backbone router, said network being in a location away
from said point-of-presence;

communication link between said router and said network, providing communication
between said backbone router and said point-of-presence router;

15 at least one antenna in communication with said primary and secondary wireless
radios, said antenna providing the basic link to said network for a subscriber having IP access to said
network and means for transceiving data thereto.
